

# Usabilla Frontend Developer Challenge

Welcome to the Usabilla Frontend Developer Challenge. The primary goal of this challenge is to establish an understanding of your attention to detail, creativity and development skills.

Using JavaScript create a web application that meets the following criteria. You may use any libraries or frameworks of your choice.

1. Fetch this JSON file <https://static.usabilla.com/recruitment/apidemo.json>
2. Display the feedback items in a list.
3. Use comment and rating filters to filter feedback items.
4. Write unit tests.
5. Make the application as responsive as possible for mobile phones, tablets, and desktops.
6. Match the provided design below as close as possible.
7. Do something creative with the extra data provided in the JSON file.

For any questions, please email us at [julia.rutkowska@usabilla.com](mailto:julia.rutkowska@usabilla.com). You can share the code with us however you want. Please include a readme file with instructions on how to build and run the code.

Enjoy and good luck!
